Summary

AI-native Senior Product Manager with 8 years across B2B platforms, logistics, and fintech, 5 of them in product. Builds decision systems on messy operational data: a pricing and quoting engine that cut quote TAT from 24 hrs to under 4.5 hrs and lifted conversion from 65% to 78%. Ships own AI tooling (RAG pipelines, Claude plugins, MCP integrations, eval rubrics) and runs an agentic stack across discovery to testing. Targeting AI PM and Senior PM roles building vertical AI for B2B workflows.

AI Product Builds

PM Co-pilot (RAG CLI) | *Python, Claude API, ChromaDB, Linear/Jira/Confluence APIs* GitHub

- Cut first-draft PRD time from ∼6 hrs to ∼1.5 hrs by building a RAG co-pilot that retrieves a PM's past PRDs and tickets as style references and pushes output to Linear, Jira, and Confluence.
- Chose RAG over fine-tuning to work from 2–3 reference docs; shipped CLI-first to validate the pipeline before a UI.

logistics-pm (Claude plugin) | *Claude skills, commands, MCP* GitHub

- Built a freight-domain Claude plugin (4 skills, 2 commands) with a 5-dimension eval rubric weighted on domain accuracy, raising average spec scores from ∼14/25 to ∼21/25 vs a generic PM plugin.

Experience

Senior Product Manager - Silq (US B2B freight forwarder) Jun 2024 – Present

Promoted PM to SPM; cut quote TAT 81%, +$325K/mo revenue *Remote*

- Cut quote TAT from ∼24 hrs to under 4.5 hrs and lifted conversion from 65% to 78% by building a 0-to-1 pricing engine on rate masters, lane pricing, and transit-time logic, adding ∼$325K monthly revenue.
- Reduced client credit exposure from $1.8M to $1.2M in 4 months by shipping QuickBooks-synced credit limits with webhook plus daily CDC reconciliation, lifting credit-term compliance to 85%+.
- Leading LLM-guided workload prioritization for sales pods and automated ingestion of vendor rate sheets, targeting a ∼40% cut in manual rate-entry effort for Procurement.
- Automated lowest-rate benchmarking via a third-party rate API on every RFQ, with expiry and refetch rules, cutting rate chase on uncovered lanes from 6–10 hrs to under 1 hr.
- Cut PRD-to-dev-ready time by ∼35% with an agentic stack (repo-aware agents, MCPs, RAG doc generation).
- Own 6 modules from RFQ to invoicing as sole SPM, leading 5 engineers and 1 designer and mentoring an APM.

Product Manager - Zetwerk (B2B manufacturing marketplace) Dec 2021 – Jun 2024

Promoted APM to PM; led 7-person pod *Bengaluru*

- Shipped a letter-of-credit lifecycle module (approvals, audit logs, MS Dynamics ERP sync) governing ∼INR 240 Cr/month across 8 business units, cutting LC approval cycle from ∼5 days to 2.
- Launched a supplier recommendation engine and a denim catalog with chatbot-assisted quoting, lifting supplier match rate by ∼20% and cutting quote turnaround for buyers.
- Drove org-wide Item Master standards (unit rates, HSN codes, OMS masters), the clean data layer behind the ERP rollout and inventory visibility for ∼INR 60 Cr of stock; won the ZetStar Award.

Analyst to Assistant Manager - Deloitte Financial Advisory Mar 2018 – Dec 2021

Built calculation engines for Goldman Sachs, Burberry *Bengaluru*

- Built calculation-engine modules (ACE, LeaseLight) letting Goldman Sachs and Burberry UK scale valuations beyond Excel.
- Built IFRS 16 transition tooling and buy-side models for ∼EUR 500–800M Spanish NPL deals; multiple Outstanding Achiever Awards.

Education

BSc Economics and Management - King's College London, UK Oct 2014 – Jun 2017

Skills

AI: RAG, embeddings, tool use, MCP, eval design, prompt design, Claude plugins, Cursor, Python
Product: 0-to-1 B2B platforms, pricing systems, SQL, Metabase, Mixpanel, Linear, Jira, Figma
