Summary

Senior Product Manager with 8 years across B2B platforms, logistics, and trade finance, 5 of them in product. Owns a US freight forwarder's operating system end to end as sole SPM partnering with the CTO. Built a 0-to-1 quotation engine that cut quote TAT from 24 hrs to under 4.5 hrs, lifted conversion from 65% to 78%, and added ∼$325K in monthly revenue. Pairs finance depth with an AI-native build workflow; targeting Senior PM roles in B2B SaaS, logistics tech, and fintech.

Experience

Senior Product Manager - Silq (US B2B freight forwarder) Jun 2024 – Present

Promoted PM to SPM; cut quote TAT 81%, +$325K/mo revenue *Remote*

- Cut quote TAT from ∼24 hrs to under 4.5 hrs and lifted quote conversion from 65% to 78% by building a 0-to-1 quotation engine (rate masters, lane pricing, dynamic transit times), adding ∼$325K in monthly sales revenue.
- Reduced client credit exposure from $1.8M to $1.2M in 4 months by shipping QuickBooks-synced credit limits against live shipment exposure, lifting credit-term compliance to 85%+.
- Validated through quote-level data that speed of response, not lower pricing, drove win rate, shifting the quoting roadmap from discount levers to TAT and pricing accuracy.
- Designed a webhook plus daily CDC reconciliation layer for invoice and credit data, catching missed events and bringing credit-position drift between systems to zero.
- Automated lowest-rate benchmarking via a third-party rate API on every RFQ, cutting rate chase on uncovered lanes from 6–10 hrs to under 1 hr for Procurement and Account Management.
- Own 6 modules from RFQ to invoicing as sole SPM, leading 5 engineers and 1 designer, mentoring an APM, and aligning Sales, Finance, Ops, and Procurement on one roadmap.

Product Manager - Zetwerk (B2B manufacturing marketplace) Dec 2021 – Jun 2024

Promoted APM to PM; led 7-person pod *Bengaluru*

- Shipped a letter-of-credit lifecycle module (approvals, audit logs, MS Dynamics ERP sync) governing ∼INR 240 Cr/month across 8 business units, cutting LC approval cycle from ∼5 days to 2.
- Delivered procure-to-delivery inventory visibility across OMS and the internal PJM tool for ∼INR 60 Cr of on-hand stock, reducing inventory mismatches by ∼30%.
- Drove org-wide Item Master standards (unit rates, HSN codes, OMS masters), the data foundation for the MS Dynamics ERP rollout; won the ZetStar Award for inventory and finance impact.
- Launched an A/R collections module for the apparel business, a supplier recommendation engine, and a denim catalog with chatbot-assisted quoting, reducing apparel DSO by ∼12 days.

Analyst to Assistant Manager - Deloitte Financial Advisory Mar 2018 – Dec 2021

Built calculation engines for Goldman Sachs, Burberry *Bengaluru*

- Built calculation-engine modules (ACE, LeaseLight) letting Goldman Sachs and Burberry UK scale valuations beyond Excel.
- Built IFRS 16 transition tooling and buy-side models for ∼EUR 500–800M Spanish NPL deals; multiple Outstanding Achiever Awards.

Selected AI Builds

PM Co-pilot + logistics-pm plugin | *Python, Claude API, ChromaDB, MCP* github.com/Vishal-Rpr

- Built a RAG PM co-pilot (CLI, then a freight-domain Claude plugin) that drafts PRDs and tickets in the user's style with a 5-dimension eval gate, cutting first-draft PRD time from ∼6 hrs to ∼1.5 hrs.

Education

BSc Economics and Management - King's College London, UK Oct 2014 – Jun 2017

Skills

Product & Domain: 0-to-1 B2B platforms, pricing and quoting, freight forwarding, OMS, trade credit, FinOps, experimentation

Tools: SQL, Metabase, Mixpanel, Datadog, Linear, Jira, Figma, Cursor, Claude, MCP, RAG
